DETAILED ACTION

Election/Restrictions

1. Claims 1-35 generic to a plurality of disclosed patentably distinct species comprising a battery case: connectable to a portable hand-held device; case having channels with openings; housing material prevent entry of water; size of openings prevent entry of water; openings located in raised portions defining channels; support structure contains plurality of projections containing recesses; support structure having first and second support portions linked by an integral hinge; case is concave and has holes; support structure allows for battery expansion; liquid impermeable covering over housing. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1745

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
